

# Sensors and Timing Module

RWT-E

**The Real World Trainers by M.C.I. are a set of five Motor Control Modules designed to teach Three Phase Motor Control using Single Phase 110 volts AC. The above module (RWT-E) is to be used with the other modules to teach Sensors and Timing Circuits. It may be used as stand alone as well. All control circuits are hard wired using industrial standards.**

## **Module Features:**

- **Inductive Proximity Sensor**
- **Photo Electric Sensor**
- **On Delay Timer**
- **Off Delay Timer**
- **Limit Switch**
- **Indicator Light**
- **Contactor**
- **Circuit Breaker**
- **Power Cord and Receptical**
- **On/Off Power Switch**
- **Protective Suitcase Enclosure**
- **Nonconductive Mounting Surface**

Power Requirements: 110-volts AC @ 2 amps.      Dimensions: 18.5" X 13.25"

Manufactured by MCI, Motor Control International, Grenada, Mississippi 800-560-1744  
Data Sheet Reference No. 68285
